

## AuthX

### Modern Authentication and Identity for Healthcare

Better Security | Better User Experience  
Better Patient Outcomes

With Citrix and AuthX, the modern cloud identity platform will focus on healthcare workflows, to:

- 1 Deliver the next generation healthcare authentication and application access.
- 2 Go Beyond Badge Tap! AuthX supports more authentication options to cater to UX.
- 3 Lower your identity costs by consolidating multiple solutions.

**Open standard based cloud native platform**  
It integrates easily with your identity stack and enables simple deployment to remote and WFH users.

**Lower overall costs**  
Consolidate multiple legacy identity tools, while giving your organization a toolbox of advanced authentication options.

**Expanded authentication workflows**  
AuthX delivers modern passwordless authentication, both with desktop and mobile workflows designed for productivity.

Join us to watch the combined forces of Citrix and AuthX work together.

Learn how to simplify and secure your identity program, while reducing overall costs.
